

OFFER OF COOPERATION

Sectoral Council for Competencies in the Renewable Energy Sector

We are pleased to invite you to familiarize yourself with the initiative of the Sectoral Councils for Competencies, implemented by the Polish Agency for Enterprise Development (PARP). The aim of the program is to develop key competencies in the Polish labor market by identifying competency gaps and supporting education and training in the most important industries. The councils monitor market changes, formulating recommendations for workforce development, allowing companies to better adapt to dynamic conditions. Green Energy – Green HUB PL Group, together with its partners, as a leader in the renewable energy (OZE) sector, is committed to the development of modern solutions and educational initiatives. Our goal is to create an effective system that will provide companies with access to qualified specialists in the OZE field and support the sustainable development of the energy economy. By collaborating with us, you will gain access to innovative training programs that will enhance your team's skills and improve operational efficiency.

Benefits of cooperation with the OZE Council:

- **As a Company (Beneficiary):** You can participate in training and workshops tailored to your company's needs, gain access to modern technologies that will improve your business efficiency (AI), receive support in developing your company's competencies, and participate in obtaining grants for your own training and investment projects. (Description of entity: any company from the energy market or a company with needs related to energy transition, zero-emission energy, and decarbonization).
- **As an Expert (Advisor):** You can offer paid advisory services funded by EU funds, have the opportunity to participate in projects that influence the sector's development, collaborate with other leaders in the OZE field, and participate in Expert Panels for Government Institutions. (Description of expert: any expert from the energy market with knowledge related to energy transition, zero-emission energy, or decarbonization).
- **As a Key Entity (Organizer of the OZE Council):** You will co-manage the work of the OZE Council, directly influence the shape and direction of the Council's activities, and participate directly in activities related to obtaining EU grants for your own needs and those of collaborating entities. (Description of Key Entity: any scientific, developmental, media, business environment, or associating entity that integrates the activities of a larger group of cooperating entities interested in energy transition, zero-emission energy, or decarbonization).

Joining the Sectoral Council for Competencies for Renewable Energy (OZE) offers the opportunity to influence the future of the sector and access market analysis and research that will help forecast trends. We cordially invite you to contact:

Paulina Smoczyńska, phone: **570-158-255** or by email: **lex@energyid.org** for any questions or to discuss the details of cooperation.
